Kevin,

I've discussed that with the state and urged them to request that through EPA HQ. I'm heading out to a meeting. I'll come by to discuss later.

Eric and Mark,

I see that in some instances, like after Katrina, EPA issued No Action Assurances (NAA) letters to allow for immediate demolition of homes which were condemned by the government as uninhabitable. Are these the NESHAPs waivers we discussed?

Given that many of these homes are single family dwellings, do you see this as an option here? Just thinking out loud...

The apartment complex is becoming an issue as well. The City is looking at knocking it down since it is so unstable.

I am back in region today and really had no plans to return to West, but the asbestos issue seems to still be lingering and very unclear. Let me know your thoughts on this. Thanks
